

# Round Up for Charity

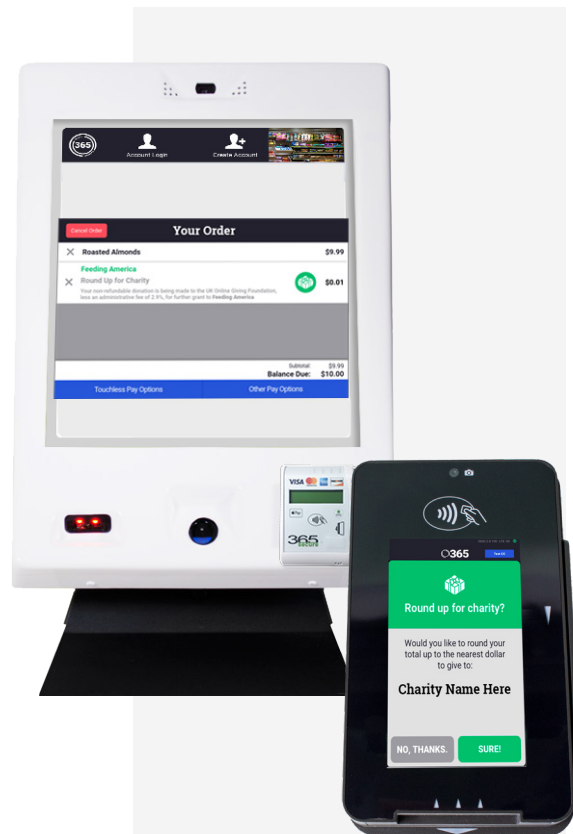

## Create goodwill with your clients through charitable giving.

The Round Up For Charity feature on ADM allows consumers to round up their transaction and donate that portion of their purchase to a registered 501(c) (3) charity, foundation, or cause that is chosen by each location's operator in advance. Operators can associate a single charity per location, and consumers can then round up their transaction to the nearest whole dollar to donate to the chosen charity.

## Work with your clients to identify causes that are meaningful to their organization!

### Integrated with Benevity

Benevity is a Calgary-based company that provides charitable donation-management and grant-management platforms. Benevity is trusted by non-profits and causes globally to power and deliver meaningful and impactful programming.

Encourage giving back through your micromarket.
