

# A BETTER WAY TO VEND!

Go contactless with VE & 365

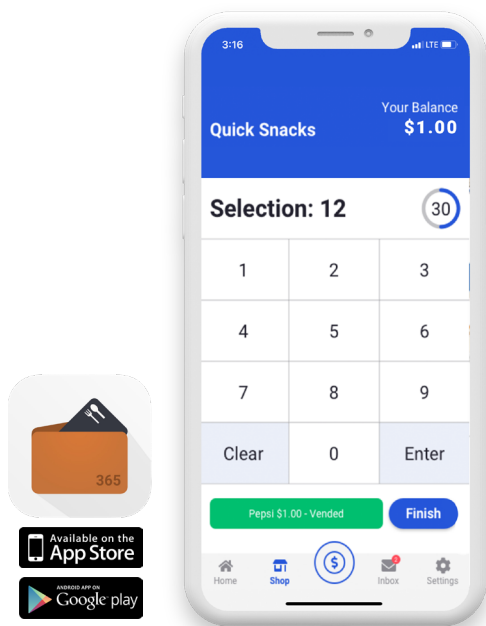

## Introducing Touchless Vending with the 365Pay app!

Make your vending contactless by using your own Smartphone. Snacking has never been easier.

Give customers the option of a contactless vending experience with the VE Contactless Solution.

With this solution customers have the ability to vend and pay from their mobile device without ever touching a keypad!

The touchless kits create a Bluetooth connection between a mobile device, using the 365Pay app, and a vending machine. Our technology requires no connectivity set up, it works just between the machine and a consumer's phone.

# Here's how it works!

Provides your customers with the convenience of one account that works seamlessly at all touchless vending machines.

Download the 365Pay app to your mobile device

Create & Fund Account in the 365Pay app

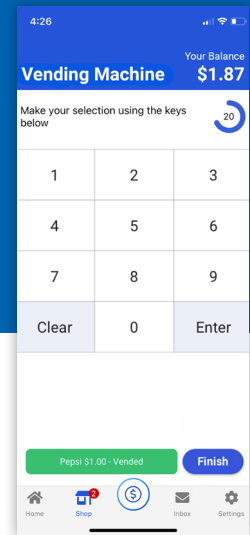

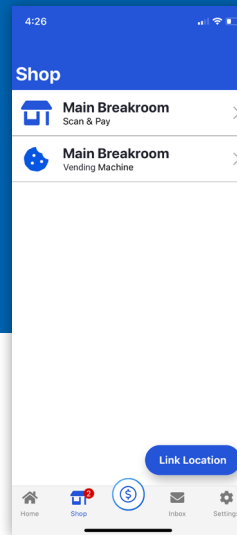

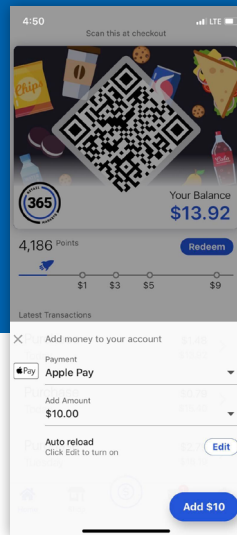

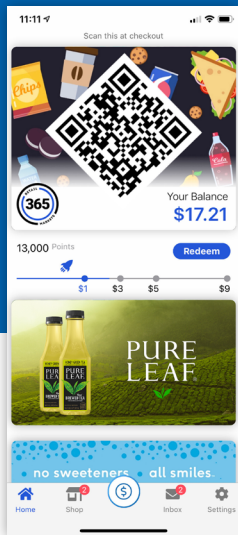

Click Shop in the mobile app and select vending machine

Select Item(s) using the keypad in the mobile app

Click Finish! Item(s) will vend and purchase is complete!
