

365Secure Readiness Details – SmartHQ Manage Locations

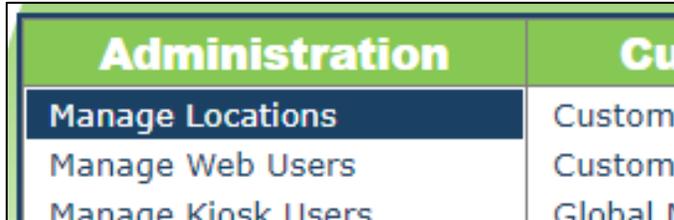

Introduction

365 has deployed an update to SmartHQ that allows you (an operator) to check your OTI status and upgrade readiness. Just follow the steps below.

Check Your OTI Status & Upgrade Readiness

1. Sign in to **SmartHQ**. If you have access to multiple operations, select your operation.
2. Select **Manage Locations** from the top, left of the main menu.

3. The **Manage Locations** table will display an additional column titled “365 Secure”. This column has three values:
 - a. **Upgrade Ready** – It has an IDTech reader now, but it is ready to add the OTI reader.
 - b. **True (date)** – It has the OTI reader, and the date in parenthesis is the date of the upgrade. If it was shipped with an OTI reader, the date will show when the kiosk was staged in our warehouse (not the go-live date).
 - c. **Attention Needed** – Click to get more information about the attention needed.
4. Click in any row to see you the **Normal Detail** view, plus a few new extras, for that location.

Manage Locations							HOME	LOG O
ID	Location Name	Address	City	State	Phone	Active	365Secure	
2	338 Dart Container	3120 Howell Rd	Mason	MI	(800) 234-7650 x	True	Upgrade Ready

Notes

The new data is in the **Application Versions** section. It will be more useful to technical support than to operators, but it is visible to anybody who wants to see it.

5. Click any **Attention Needed** link in the **365Secure** column and the **Popup View** will display.

Popup View

380 Magna North		
VSH315399		
App	Version	Required
911	4.1.3 Build 1186.47 SP3	4.1.3 Build 1186.42 SP3
Valet	2.0.6.163	2.0.6.12
Sync	1.0.8.281	1.0.8.27
PDC	1.08.06	1.07.02
.Net	4.0.30319.42000	4.0.30319.42000
C++	14.0.23026	14.0.23026
TLS	1.2	1.2
OTI	Unknown	1.5.1.1

The Popup View will show the exact applications that are being checked, with the:

- *Required* version on the right in **Black**
- *Version* on the kiosk on the left in:
 - **Green** – Good
 - **Red** – Bad
 - **Black** – Unknown, if there is no version of the software currently on that kiosk.

Note: The Popup View works well in Internet Explorer, Edge, Chrome, and Opera, but not in Firefox.

365Secure Readiness Details – SmartHQ Manage Locations

6. On the main page, the **Export** button will export data showing every kiosk at the operation and all details relevant to OTI upgrade readiness to an Excel Spreadsheet. This includes an upgraded indication of which kiosks are Standalones, MKL Servers, and MKL Clients.

A screenshot of the SmartHQ Manage Locations interface. The interface has a light green background with a white grid pattern. At the top left, there is a 'Search:' label followed by a white text input field. Below this is a 'Search Options:' label followed by a dropdown menu currently showing 'All Locations'. Underneath the dropdown are three buttons: 'Get Locations', 'Export', and 'Main Menu'. The 'Export' button is highlighted with a red rectangular border. Below the buttons is a checkbox labeled 'Active Only' which is checked. At the bottom left, there is a 'Show' label followed by a dropdown menu showing '10' and the text 'rows per page.'
