## PCI DSS v4.0 Attestation of Compliance for Report on Compliance – Service Providers

Entity Name: 365 Retail Markets dba 365 Retail Markets LLC

Assessment End Date: 26-Jan-2024

Date of Report as noted in the Report on Compliance: 07-Feb-2024

#### Section 1 Assessment Information

#### Instructions for Submission

This Attestation of Compliance (AOC) must be completed as a declaration of the results of the service provider's assessment against the *Payment Card Industry Data Security Standard (PCI DSS) Requirements and Testing Procedures ("*Assessment"). Complete all sections. The service provider is responsible for ensuring that each section is completed by the relevant parties, as applicable. Contact the entity(ies) to which this AOC will be submitted for reporting and submission procedures.

This AOC reflects the results documented in an associated Report on Compliance (ROC). Associated ROC sections are noted in each AOC Part/Section below.

Capitalized terms used but not otherwise defined in this document have the meanings set forth in the PCI DSS Report on Compliance Template.

Born out of the need for better ervice and convenience options, operators have quickly gravitated e open-air, small convenience store Market. The 365 Kiosk and application to quickly scan a product they have ert, or swipe a credit card and be so within minutes without leaving the ttors typically offer around 300	

products from bottled beverages to greeting cards. This means that as an employer, you can create a company themed MicroMarket to further emphasize your commitment to providing employees with a market leading alternative to vending machines. At the heart of the MicroMarket is the 365 Kiosk payment center where the customer scans and pays for their items. The 365 Kiosk can be configured in multiple ways, including a cash or no-cash dispensing option. The Kiosk can be branded for any environment.

All devices on the V5 platform including the MM6 Kiosk, Gen3 Kiosk, PicoMarket, PicoCooler, PicoVend, PayPlus, and 365Dining POS, utilize a secure E2EE (End-to-End Encrypted) or P2PE (Point-to-Point Encrypted) direct real-time connection to the card processor when items are checked out. The transactions are card present or contactless EMV, with no cardholder data stored for later use. Transactions are needed to complete purchase of items from the self-service, stand-alone, kiosks and mini-retail shops where 365 Retail Markets provide their services. All data is encrypted by the card reader at time of card swipe, 365 Retail Markets does not have access to the encryption keys and cannot decrypt this encrypted cardholder data. This dramatically reduces the scope as 365 Retail Markets does not store, processes and/or transmit (PAN data encrypted during transmission, but 365 Retail Markets does not have access to keys hence not in scope).

365Pay mobile application utilizes Heartland Payment Systems PCI DSS certified Heartland SecureSubmit backend solution for e-commerce transactions.

The web version of 365Pay is mymarketaccount.net which utilized the Heartland Payment Systems PCI DSS certified Heartland Portico

Describe how the business is otherwise involved in or has the ability to impact the security of its customers' account data. Entity is not exposed to clear-text CHD. All CHD is collected by the POI device deployed within the kiosk and encrypted by the POI device. This information is sent directly to the processor for payment processing. Upon completion of processing the truncated PAN is provided to the 365 Retail backend environment along with results of the transaction request.

Describe system components that could impact the security of account data.

Kiosks and servers supporting the solution.

#### Part 2c. Description of Payment Card Environment

Provide a high-level description of the environment covered by this Assessment.

For example:

 Connections into and out of the cardholder data environment (CDE). Assessment addressed all system components within the CDE to include database servers, application servers, and web servers. Assessment covered connection to payment processors and development of the software used by entity in delivery of their services. Assessment also assessed implemented

#### **Section 3** Validation and Attestation Details

## Part 3. PCI DSS Validation (ROC Section 1.7)

This AOC is based on results noted in the ROC dated (Date of Report as noted in the ROC 2024-02-07).  Indicate below whether a full or partial PCI DSS assessment was completed:  □ Full Assessment – All requirements have been assessed and therefore no requirements were marked as Not Tested in the ROC.  □ Partial Assessment – One or more requirements have not been assessed and were therefore marked as Not Tested in the ROC. Any requirement not assessed is noted as Not Tested in Part 2g above.					
		e ROC noted above, each signatory identified in any of Parts 3b-3d, as pliance status for the entity identified in Part 2 of this document (select one):			
	as being either In Place or	f the PCI DSS ROC are complete, and all assessed requirements are marked. Not Applicable, resulting in an overall <b>COMPLIANT</b> rating; thereby 365 istrated compliance with all PCI DSS requirements except those noted as Not			
	Non-Compliant: Not all sections of the PCI DSS ROC are complete, or one or more requirements are marked as Not in Place, resulting in an overall NON-COMPLIANT rating; thereby (Service Provider Company Name) has not demonstrated compliance with PCI DSS requirements.				
	Target Date for Compliance: YYYY-MM-DD				
	An entity submitting this form with a Non-Compliant status may be required to complete the Action Plan in Part 4 of this document. Confirm with the entity to which this AOC will be submitted before completing Part 4.				
	Compliant but with Legal exception: One or more assessed requirements in the ROC are marked as Not in Place due to a legal restriction that prevents the requirement from being met and all other assessed requirements are marked as being either In Place or Not Applicable, resulting in an overall COMPLIANT BUT WITH LEGAL EXCEPTION rating; thereby (Service Provider Company Name) has demonstrated compliance with all PCI DSS requirements except those noted as Not Tested above or as Not in Place due to a legal restriction.				
	This option requires additional review from the entity to which this AOC will be submitted.				
	If selected, complete the following:
