

Fingerprint Reader Information

The Fingerprint Reader and You

The fingerprint reader is strictly an optional convenience feature and is never required to utilize the kiosk

- The 365 fingerprint reader, allows for easy login to quickly purchase and enjoy products. This technology gives consumers a secure and safe way to utilize their personal account at any fingerprint enabled location.
- Fingerprint technology benefits the operators and consumers and leads to greater purchase power and increase in sales.
- Fingerprint log-on is simple, fast and secure. First you “register” your fingerprint by placing on the print reader. The system saves enough unique information about your fingerprint to create a template so that a fingerprint reader can later identify you.
- 365’s technology partner, DigitalPersona, has given much consideration to security and user privacy issues. Fingerprint data is encrypted everywhere along the data path offering protection from tampering and maintaining the user's privacy.
- **An image of a user's fingerprint is never stored in the kiosk database**, nor can a fingerprint image be reconstructed from the encrypted data points of the string. Fingerprint data is deleted when a user account is decommissioned per the operator.
- If there is not enough matching information, the system will not verify you or log you on, keeping your information safe and only useable by you!

Caring for Your Fingerprint Reader

Taking Care of Your Fingerprint Reader

- The fingerprint reader, while tolerant of residues left on the reader, performs optimally when kept clean!
- Do not pour any liquid directly on the reader window
- Do not use alcohol-based cleaners
- Never submerge the reader in liquid
- Never rub the window with an abrasive material, including paper
- Do not poke the window coating with your fingernail or any other item, including a pen

How to Clean the U.are.U Fingerprint Reader

- Apply the sticky side of a piece of adhesive cellophane tape to the window and then peel it away
- Apply distilled water to a soft cloth and wipe gently
