

Are You Worried About Theft in Your MicroMarket?

365 Cancel Alert

The Cancel Alert is designed to reduce theft by better enabling operators to collect data and investigate shrinkage.

When a purchase is cancelled, the kiosk webcam captures an image of the customer and real-time transaction details. This data is uploaded to ADM and logged as a Cancel Alert, including the location, time cancelled, kiosk screen, total amount, and customer account.

Identify high-risk theft scenarios by collecting more data

Match video footage and timestamps to the time of theft

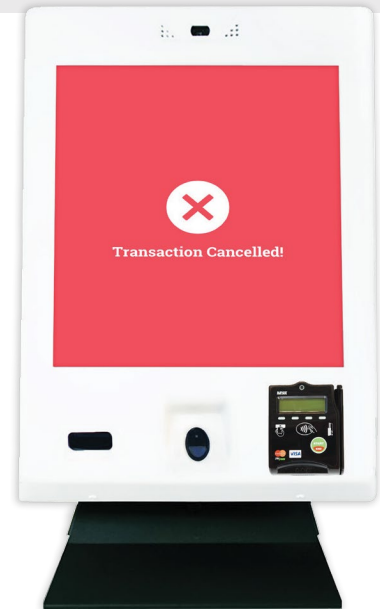

Instantly capture image of customer when cancel is selected

Data analytics & support provided by 365's in-house security team

Theft accounts for <4% of MicroMarket shrinkage, but 365 is decreasing it even further!

Cancelled Transaction App & Display

Newest Feature of 365 Cancel Alert

It's easier than ever to deter theft and control MicroMarket revenue with 365's newest security feature upgrade.

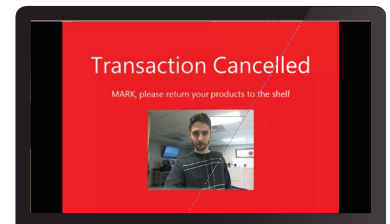

In addition to uploading the customer image and transaction details to ADM, the Cancel App will clearly display each cancellation on an ancillary screen adjacent to the MicroMarket kiosk and visible to anyone in the immediate vicinity.

Instantly display captured image of customer when transaction is cancelled

Reduce high-risk theft scenarios by capturing and openly displaying data

Package Includes:

- 32" Monitor
- Cables
- Mounting Kit
- 365 Cancel Alert Software
- Signage PC

*This is in addition to the recommended existing cameras and DVRs placed in the MicroMarket
