

# Built for Campus Life

## Campus card payments just got easier.

Bring your unattended retail to a campus near you - no extra hardware, no complicated setups. Just more ways to service the needs of a campus community.

With new Campus Card support from 365, students and staff can pay using physical or mobile credentials right on the same card reader device that is already in use. Whether they're grabbing a drink or a snack during their study break, or purchasing essential personal care items without the need to leave campus, the experience is easy, fast, and secure.

## Make campus checkouts smarter. Start accepting student credentials with ease.

\*Your account manager will help determine if an external HID reader is needed, dependent on campus card type.

### Streamline payments

Accept campus cards and debit/credit on a single reader in most cases\* - no external devices or account required.

### Support all the ways students pay

From magnetic swipe to NFC tap (via Apple or Google Wallet), our solution makes it easy for every student to check out in seconds.

### Go live with minimal lift

Already have a supported device? We can push updates remotely. New install? Just allow 6 weeks for test cards and compatibility setup.

### Work smarter with 365 integration

Set up and manage campus card transactions through the management software you already use.

### Expand your campus footprint

Meet the needs of students and staff in more places on campus, with our expanding line of support. From vending to kiosks and smart coolers (coming soon!), you'll be ready to tackle every area of campus living, from dorms to libraries to academic buildings!
