Introducing
365 Catering

Innovative cloud-based catering solutions tailored for Food Service Operators. Simplify your operations, boost efficiency, and provide an outstanding experience for your customers.

Key features

1. Seamless order management

Handle orders from multiple locations with ease. Our platform enables efficient order processing, ensuring a smooth customer experience.

2. Flexible configurations

Adapt the platform to your needs with customizable menus, service styles, and order workflows.

3. Robust back office tools

Manage everything from orders to invoicing with these powerful tools:

- Dashboard & calendar
- Customer database
- Order & menu management
- Quoting & invoicing
- Delivery assignments
- Detailed reporting

> 365 Catering has made our catering system incredibly efficient. It saved time for our team, and created a more welcoming and hospitable experience."

Laura Fehrle, General Manager at Garces

# What makes 365 Catering different?

- **Two order flows**

  Handle different service styles and groups through a single back office while offering unique experiences with two front-facing URLs.

- **Group ordering**

  Simplify meal distribution with individually labeled meals and automated tools for administrators.

- **Multi-slot ordering**

  Combine breakfast, lunch, and dinner into one transaction, making it convenient for customers and operators alike.

Why choose 365 Catering?

Our technology is designed to help food service operators thrive by streamlining operations and driving revenue. From small restaurants to large-scale catering operations, 365 Catering is the smart choice for your business.
