Recoup funds for stolen items

- Log individual case files with comprehensive location and consumer details
- Link a video URL and notes to the case for easy reference to case evidence
- Notify consumers about their case via email directly from the ADM back-office
- Provide consumers with a secure, convenient website to remit payment
- Stay up to date on recovery efforts by filtering between paid/unpaid case status
- Receive recouped funds through standard 365 disbursement processes

It's never been easier to take action and follow through

If your accounts are unwilling to work with you to combat shrinkage, Asset Recovery Case Management is a centralized process that helps you recover stolen funds.

Managing asset recovery is not limited to just micro markets. Use ADM to address cases in any vending, smart store, or dining location.

Don't let your stolen funds go unrecovered. Use Asset Recovery Case Management in ADM to tighten controls, recoup revenue lost to theft, and run a more secure operation.
