

The smarter way to pay with 365 Dining

No cash? No problem. Just swipe and go!

Payroll Deduct lets employees pay with their badge or app—no wallet needed. Purchases pull from their **Global Market Account (GMA)** and are deducted from their **next paycheck**, even if they're short on funds now.

It's fast, easy, and frictionless—powered by **ADM** for full transparency and control. From coffee runs to lunch breaks, 365 Dining keeps things moving.

How do consumers pay?

All Payroll Deduct purchases are routed through the consumer's GMA. Payroll Deduct is a characteristic of GMA that enables spending even with a \$0 balance.

Consumers can access their GMA—and use Payroll Deduct—through two easy options:

- 1 Badge Swipe at an RFID Reader**
Employees swipe or tap their ID badge, which is linked to their GMA using an assigned Payroll Deduct ID.
- 2 365Pay App QR Code**
Consumers can scan their unique QR code in the 365Pay App to check out. If their GMA has insufficient funds, Payroll Deduct covers the purchase and deducts it from their next paycheck.

Payroll deduct reporting

ADM provides dedicated reports to make payroll reconciliation simple and accurate:

- **Payroll Deduct Details Report:** Lists every individual transaction for full transparency
- **Payroll Deduct Summary Report:** Aggregates total spend per employee for integration with the client's payroll system

Make it effortless with Payroll Deduct
