MarketSight™

Stop theft before it happens

In micro markets, the risk of theft and under-ringing is always present.

With this groundbreaking solution, operators have the reassurance they need to expand or maintain service in high-shrink or high-traffic locations.

"

The MarketSight™ retrofit kit brings AI-powered loss prevention to your existing MM6 Mini micro market locations.

Upgrade your defense against theft
sales@365smartshop.com

Prevent loss before it starts

- **Real-time AI detection:** MarketSight™ performs a real-time comparison between the number of items scanned and the number of products that pass through the scanning area—helping identify potential missed scans before checkout is complete

- **Smart user prompts:** On-screen guidance corrects checkout behavior as it happens

- **Visible deterrence:** A sleek, top mounted camera encourages honest interactions

Installation made easy

- **Retrofit in minutes:** Upgrade any MM6 Mini in under 10 minutes

- **Plug & play simplicity:** Pre-assembled kit ensures a seamless setup

- **Designed to fit:** Minimalist camera arm maintains the MM6 Mini's modern aesthetic

A complete solution

- **Actionable insights:** View under-ringing events directly in ADM alongside cancel reports for targeted resolution

- **Fully integrated:** Seamlessly integrated into 365's ecosystem for a smarter, more secure self-checkout experience

- **Future-ready:** OTA updates will provide continuous improvements and feature updates, staying ahead of loss prevention needs
