The 365Ops App

Back-office operational insights in-hand and on demand

Unattended retail is synonymous with 24x7 availability, which means food service operators need similar tools to help them manage their business from anywhere, at any time.
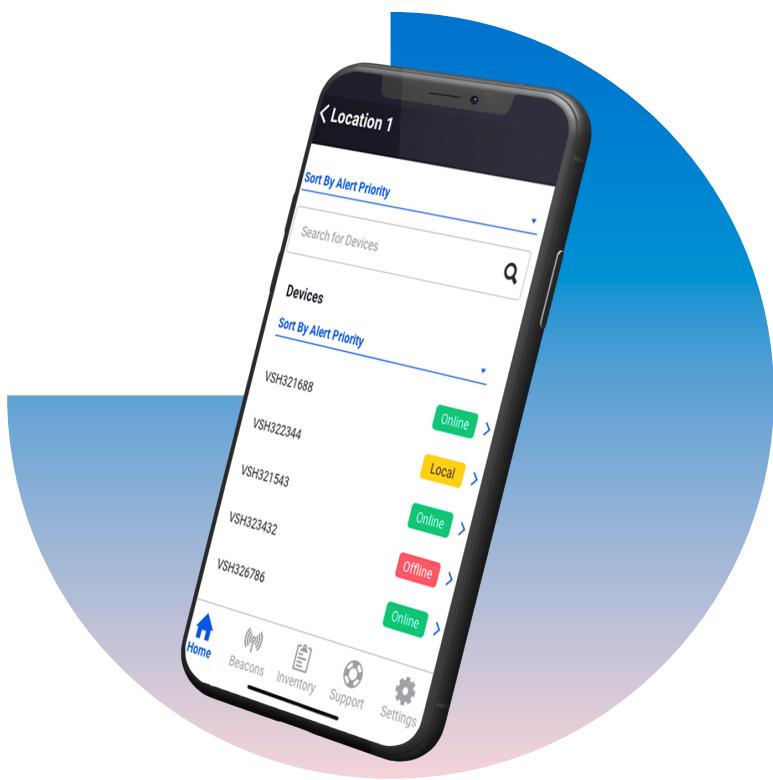

With the 365Ops App, important back-office functionality and insights from 365 Connected Campus℠ solutions are available on-the-go without logging onto the 365 back-office platform, ADM, from a desk. With this intuitive mobile user interface, executives and route drivers can now:

Know more about your Micro Market, Dining, Vending, and Smart Store operations with the 365Ops App. Operators, download it on compatible mobile devices in the Android and Apple stores today.

Ensure market uptime

- View real-time device status and sort alerts by priority across all locations
- Sync and reboot devices remotely
- Perform vending diagnostics and test vends
- Connect with 365 Support for assistance

Make updates right in the field

- Manage inventory and product details
- Update product or dining menu item images
- Capture Stockwell service images during restock
- Deploy and relocate 365Beacons

Track sales performance

- View sales data by the organization or location level
- Get a snapshot of daily revenue and average transaction amounts
