

# Hassle-free dining experience with 365 Dining

Modern day cafeterias can be tough to navigate. From long lines to slow food preparation and confusing delivery, grabbing a quick bite to eat can actually take a long time.

But with 365Dining, we can implement self-checkout dining solutions that improve the cafeteria experience. Let consumers skip the lines, order easily, and get what they want, right when they need it.

## Fast & easy

From the self-checkout kiosk, hungry customers can easily see the food and beverage options available, make selections, and customize to their preferences. Grabbing something that is ready-to-go? No problem! Our kiosks have built-in barcode scanners to make it easy to scan, checkout, and enjoy.

## Order on-the-go

Let patrons skip the line and order directly from their smartphones using the mobile app. Users can schedule orders in advance so that lunch is ready when they are!

## Prefer a personal touch?

We've got options for cashier-service, as well as hybrid kiosks that can flex between cashier and self-service depending on the time of day. Whatever your needs are, we can deliver with 365 Dining's best-in-class technology.

Elevate your dining experience.
