365 Catering

Innovative cloud-based catering solutions

"365 Catering (formerly Spoonfed) has made our catering system for multiple locations incredibly efficient. This has saved time for our team and created a more welcoming and hospitable experience for our guests."

Core Application

Manages hospitality, executive dining, event catering, and more.

- Continually enhanced, exciting product roadmap to align with client expectations

Client Financial Control

Create optional approval pathways, and charge code validation.

Group Ordering

Built for "today's workplace" meetings.

- Individually labeled deliveries and automated functionality for Admins

Flexible Configurations

For accounts requiring a specialized touch.

- On-site menu and allergen management

Provide catering services with ease
