

## The 365 Accessibility NavBar

# Easy checkout for every customer

The 365 Accessibility NavBar is now available on 365 Dining kiosks (MM6 ReadyTouch and MM6 Mini ReadyTouch). When used with the mounted navigation bar, it provides an alternative checkout method for users who require additional assistance. The navigation bar offers tactile controls that allow users to navigate the Order Now flow and complete purchases without using the touchscreen.

The mounted navbar provides tactile navigation, allowing users to independently browse and complete purchases with confidence.

## How to use the accessibility navigation

### Next/Down Arrow

- Moves user to the right
- Moves the user to the next element

### Back/Up Arrow

- Moves user to the left
- Moves the user to the previous element

### Green Circle
