

The Gen3c kiosk was designed to offer unprecedented functionality to help optimize both new and existing MicroMarket locations. A recessed biometric fingerprint reader and our latest 2D barcode scanner for use with the all new 365Pay app make paying with a stored value account easier than ever. A dual sided commercial grade credit card reader ensures that even consumers without an account can quickly and securely make a purchase. The Gen3c kiosk also features a MEI bill validator and a thermal receipt printer, ideal for locations requiring that added functionality. Accessing and servicing all of these components within the purpose-built hardware is quick and easy with the front loading and clam shell designs.

Mounting Options

Mounts to an existing countertop

Specifications

Item	Description
Housing	Scratch resistant ABS with UV cap. Printer and bill acceptor inside secure full metal enclosure.
Dimensions (HxWxD)	27" x 23" x 14"
Electrical	Max current draw: 2.5 A; Max power consumption: 300 W; Input Voltage 100-240V AC
Weight	69 lbs

Features

Item	Description
Biometric Reader	Users can access their stored value account using their fingerprint
Audio Speakers	Users are guided by audio prompts throughout the transaction
Serviceability	Easily change printer paper and service bill acceptor
Modular Design	Detachable printer and bill acceptor module

The Gen3 kiosk is our industry leading solution that was designed to offer unprecedented functionality for both operators and end-users alike. This unit is ideal for white collar locations that prefer a cashless environment, as well as for larger locations that need an additional payment center. The Gen3 comes equipped with an all-new compact form factor, zero maintenance design, a dual sided secure credit card reader, a recessed biometric fingerprint scanner, and the latest in 2D barcode scanning technology. This unit takes full advantage of the updated kiosk interface and backend management platform.
