

# ADM Active App Users column

## Location List in ADM

A new column called **Active App Users** will now display the count of unique users who have used the 365Pay app in any capacity in the past 30 days at a location, when it is the user's home location.

On the column header, a tooltip will display when an ADM user hovers over it. The tooltip will say "The count of consumers who have used the 365Pay app within the past 30 days".
