# Link your accounts in the 365Pay app

If you have multiple accounts (e.g., one with a market card/badge and one without), you can easily link them in the 365Pay app—either during signup or after logging in.

During app signup

1. Download the **365Pay** app.
2. Tap **Sign Up**, enter your email, and verify with the security code emailed to you.
3. If the email entered isn't recognized in the system, you'll see an account creation form—fill out the form, check the box for "**Have a market card *(badge)* or QR code from a kiosk?**", and tap **Join Now**.
4. The Scan screen will display. You can either:
   - Scan your **market card/badge** - **OR**
   - Go to a kiosk, log in (with fingerprint or email + PIN), and scan the **QR code** on the **Account Management** screen (Note: Account Management QR code not available on smart cabinets)
5. If you scanned a:
   - **Market card/badge:** you'll be prompted to enter the **PIN** tied to that account (this is not the same as the emailed security code). If the PIN is valid, you'll receive a success message and your accounts will be merged
   - **Kiosk QR code:** no PIN is required—if recognized, you'll receive a success message and your accounts will be merged

After app signup

1. Log into the **365Pay** app with your email and verification code.

2. Go to the **Account** tab.

3. Under **Link Accounts**, choose:
   - **Scan Market Card** *(badge)* **OR**
   - **Scan Kiosk QR Code**

4. If you scanned a:
   - **Market card/badge:** you'll be prompted to enter the **PIN** tied to that account (this is not the same as the emailed security code). If the PIN is valid, you'll receive a success message and your accounts will be merged.
   - **Kiosk QR code:** no PIN is required—if recognized, you'll receive a success message and your accounts will be merged.
