

More capacity. More opportunity

Get 20% more product capacity with PicoCooler Vision MAX.

Every inch of merchandising space matters. PicoCooler Vision MAX gives operators more room to sell by adding a sixth shelf—expanding product capacity by 20% within the same trusted vision smart store footprint.

With more facings, more inventory, and more merchandising flexibility, operators can reduce stockouts, support higher-volume locations, and create a stronger consumer experience without adding additional equipment.

A redesigned condenser deck also improves in-field serviceability, providing easier access for maintenance and helping reduce service time when it matters most.

Built on the proven PicoCooler Vision platform, MAX delivers the same frictionless grab-and-go experience operators rely on today—with even greater revenue potential.

Key features

- 20% increased product capacity with an additional shelf
- More facings for top-selling products
- Reduce stockouts in high-traffic locations
- Expand product assortment without increasing footprint
- Increase revenue potential from every cooler deployment
- Redesigned condenser deck for faster, easier field service and maintenance
- Frictionless computer vision checkout
- Supports beverages, fresh food, snacks, and more
- Powered by the same proven PicoCooler Vision technology
- VisionLink-ready to support future expansion into connected, multi-cabinet smart store deployments
