

Charging iPads

Note: Return all iPads to the charging station for overnight charging

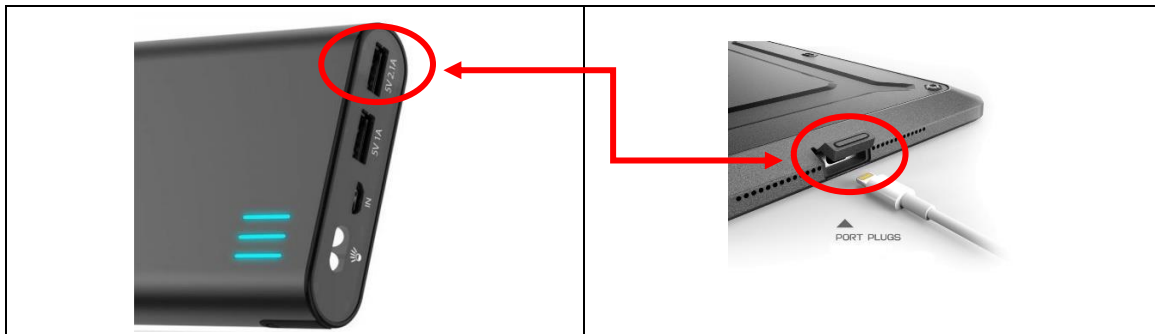

Hardware:

1. Battery Backup
2. iPad with case
3. 1' Lighting charging cable
4. 6' Micro USB charging cable
5. Power charging brick

Setup:

- The Battery Backup is mounted to the back of the iPad.
- **The 1' Lighting charging cable (#3) connects from the 2.1A port of the Battery Backup to the Charging port of the iPad (Leave this cable connected – do not unplug at any time)**

Charging instructions:

- All iPads should be on before you start the charging process.
- Connect the **6' Micro USB charging cable (#4)** into the micro USB port on the **Battery Backup** and other end into a **power charging brick (#5)**.
- A charging symbol should display next to the battery icon on the iPad.
- Verify the charging indicator on the **Battery Backup** is now active.
- Press and hold the power button the iPad until given the option to switch off the iPad.
- Turn iPad off to complete the process and properly charge the **Battery Backup and iPad**.

Note: If the iPad is dead, plug the iPad in to charge until it turns on and has at least a 5% charge. If the iPad is left on while charging, the batter backup will not charge.
