

An automated method for funding accounts

365 Subsidies is an easy-to-use, automated software capability that unlocks the ability to create customizable subsidized user groups for operators. When implemented, these subsidies serve as an additional benefit to employees.

This new capability enables automatic funding to desired user accounts on a predetermined schedule, allowing operators to engage employees with a consistent, reliable marketplace benefit.

Choose from numerous settings to create the perfectly customized subsidy program:

- Determine if employees receive funds Daily, Weekly, or Monthly
- Set the subsidy amount, whether it's \$1 a day or \$100 a week
- Allow for the funds to compound or implement a 'use it or lose it' program
- Segment employees to create different subsidy tiers
