

365Dining Platform

Bringing end-to-end technology solutions to the foodservice industry

365Dining provides a suite of innovative technologies that transform in-house dining with one focus in mind; the customer experience.

ReadyFlex POS

Flexible dining point-of-sale technology with both self-service and cashier capabilities within one intuitive platform.

Self-Service Dining Kiosk

New 365Dining self-service kiosk ideal for placement in both dining and micro market environments, providing a seamless and innovative ordering experience for customers.

Order Management System

The 365 order management system includes both the Kitchen Display System (KDS) and Now Serving screens to efficiently connect your front and back-of-house operations. The results? Increased staff productivity, reliable order accuracy and an enhanced customer journey with real-time order status updates.

Back-end Management (ADM)

ADM delivers complete operational control of your dining business for menu management, reporting, promotions, inventory and more. Use one backend software to manage operations for dining, micro markets, coffee service and vending all within one 365 connected campus experience. Spend time maximizing profitability instead of moving across multiple platforms.

Additional benefits with 365Dining

- Order ahead & 365Pay App
- Contactless pickup with 365Lockers
- Loyalty program

It's time to transform dining.
