

# SmartE - The Newest Innovation in Vending

*Intelligent, secure refreshment for any location*

SmartE is an intelligent, secure vending solution for almost any environment. Use as a stand-alone unit or combine with other modules to create a market statement.

## Diversify your business

Target smaller locations where a micro market or Smart N Go may not be suitable

- Office complexes and multi-tenant buildings
- Schools, colleges and universities
- Hospitals and medical centers
- Airports, train and metro stations
- Hotels and resorts
- Athletic stadiums and arenas
- Entertainment Destinations, e.g. casinos, museums, zoos, cruise lines and more
- Military bases and prisons

## How it works

### For operators

- All products are secured behind locking glass door
- Payment methods are pre-authorized
- Infrared sensors capture real-time selections
- Automatically records items as they are removed or returned to shelf
- Shopping cart is auto-populated with purchases
- Business intelligence and reporting provided through the Avanti Market System
- Built in cameras monitor customer activity 24/7

### For customers

- Quick swipe, grab and go for refreshment
- Ability to pick up products and review nutritional information
- Fresh options and broad product variety
- Accepts most major credit and debit cards

Protected by US and International patents.  
US 10,083,430,B2 and US 9,536,236,B2

# A Custom Fit For Any Location

## Customizable to address any customer's needs

SmartE can be configured to carry a variety of items

- Ambient Snack Module: Snacks and Sundries
- Refrigerated Module: Fresh Food and Beverages
- Dual Zone: Half-and-half, for compact yet versatile product offerings
- Can be combined with a second SmartE. If more than two modules, a Smart N Go Market is recommended
