Smart N Go Markets Overview

- Revolutionary alternative to vending machines and full-scale cafeterias
- Ability to offer fresh food, beverages, snacks, coffee and more for employees and visitors
- Little or no cost to your facility

Fresh Take on Refreshment

- Users enjoy “high-tech” shopping experience that overcomes traditional vending limitations
 - Touch products, read labels, enjoy broader product choices, and use an array of payment options (debit, credit, member market card and more)

Cutting-Edge

Unattended

Secure

Automated

Modular

Perfect Solution for Your Food Service

- Great opportunity to reduce costs associated with operating a cafeteria or café at your medical center
- 24/7 access for employees and visitors
- Puts healthy options in reach – tailored product mix based on demographics and purchase preferences in your area
- Increase employee satisfaction
- Fast and easy – No lines!

Endless Configuration Possibilities

- **Main Station** - Video Instructions, Promotions, Facility Messages, Receipt Printing, Sundries
- **Snack Module** - Chips, Bars and More
- **Refrigerated Fresh Food Module** - Sandwiches, Salads, etc.
- **Refrigerated Beverage Modules** - Variety of cold beverages
- **Coffee station** - Bean-to-cup customizable coffee

Where Can These Markets Go?

- *Can be placed anywhere in your building where you have food service needs*
- *Supply the space, internet and electricity and your local market operator will take care of the rest, including installation, servicing, re-stocking, and maintenance*

Perfect
For

5-Module Configuration

Dignity Health - St. Rose Dominican, Las Vegas

4-Module Configuration

Children's Hospital - Colorado Springs

3-Module Configuration

Children's Hospital - North Campus

2-Module Configuration

How it Works: Secure Doors

- Each Smart N Go Market is equipped with secure, locked refrigerated and non-refrigerated bays to stock and display a large and diverse product mix

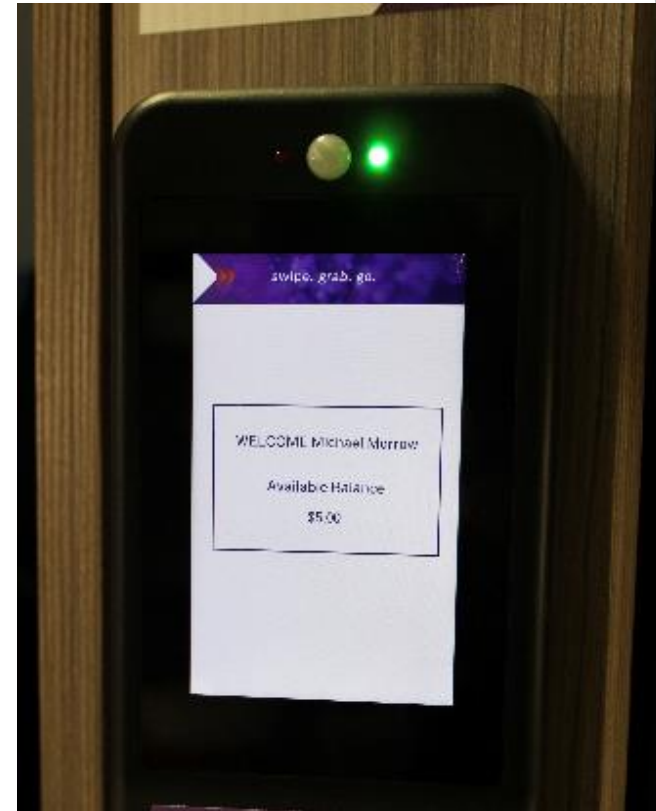

How it Works: Payment Preauthorization

- Doors unlock only after the customer payment method is verified
- Payment can be made using credit card, debit card, member market account, biometrics and more

Most Major
Credit & Debit
Cards Accepted.

How it Works: Intelligent Sensing

- Detects and identifies products in real time using sensors
- Shopping cart is automatically updated as items are removed or replaced, allowing users to read labels and make informed purchase decisions

How it Works: Completing Sale

- Finished shopping? Just shut door and walk away
- Want more? Re-swipe payment method at another module
- Want a receipt? Go to Main Station

How it Works: Security Cameras

- ▶ Each Smart N Go module has two cameras housed next to the overhead screens
- ▶ One camera is filming 24/7 (#1) and stores the footage on an NVR that is inside the Main Station module
- ▶ The other camera (#2) turns on once a customer opens a module door. Camera 2 displays a live feed so that way the customer knows they are being monitored

See it in Action
